The Benefits of Choosing a York® DELUXE DIAMOND® 95 FURNACE

NEW LEVELS OF COMFORT.

The Deluxe Diamond® 95 furnace operates on two heating levels. Most of the time it runs at low capacity (using less energy) to maintain the required heating level in your home. On bitter cold days, it runs in Turbo-Mode heating capacity, ensuring your home stays warm and cozy at your selected temperature.

MONEY SAVING OPERATION.

Replacing an older furnace with the Deluxe Diamond 95 means reduced gas heating bills as much as 35%!

IMPECCABLE CONSTRUCTION.

Meeting strict quality standards, York® builds each furnace with corrosion-resistant materials and sound-dampening devices. Plus, two-stage operation means less starting and stopping, which greatly reduces wear and extends furnace life.

FEATURE	BENEFIT
Aluminized-steel heat exchanger and stainless steel secondary heat exchanger	Both extend furnace lifespan and have a lifetime-limited warranty
Acoustically insulated blower compartment	Ensures quiet operation
Electronic ignition system and Quiet Inshot burners	Keep heating costs low
Blower circulates more air, more often	Promotes even temperatures as filter removes more air pollutants

1. The Federal Government has established Annual Fuel Utilization Efficiency (AFUE) ratings to allow you to compare the efficiency of furnaces. The higher the AFUE percentage is (like 94%), the more efficient the furnace.
