

Diamond® 95 ULTRA VARIABLE-SPEED GAS FURNACES

- Rated up to 94% AFUE¹
- Economic Two-stage Heating
 - Whisper Quiet Comfort
- Upflow and Downflow/Horizontal Models Available

The Benefits of Choosing a York® DIAMOND® 95 ULTRA FURNACE

ULTRA HIGH-EFFICIENCY.

In a typical home comfort system, the advanced ECM motor of a York® Diamond® 95 ULTRA furnace uses less electricity than a 100-watt light bulb. Conventional furnace motors, on average, consume nearly 500 watts.

TWO-STAGED COMFORT.

During moderately cold days this two-stage variable-speed furnace runs at low capacity, efficiently heating your home. On bitter cold days, second-stage heating capacity turns on to maintain indoor comfort. This smart process eliminates wasted energy, reduces heating bills, and keeps you warm all day long.

DURABLE CONSTRUCTION.

Meeting strict quality standards, York builds each furnace with corrosion-resistant materials and sound-dampening devices. Plus, two-stage operation means less starting and stopping, which greatly reduces wear and extends furnace life.

FEATURE	BENEFIT
Acoustically insulated blower compartment	Ensures quiet operation
Pre-painted solid steel cabinet	Resists corrosion and maintains attractive exterior
Blower circulates more air, more often	Promotes even temperatures as filter removes more air pollutants
Two-stage, variable-speed furnace engineering	Compared to conventional furnaces, operating costs are slashed up to 35%
Electronic hot surface ignition	Saves fuel costs, increases dependability and reliability

1. The Federal Government has established Annual Fuel Utilization Efficiency (AFUE) ratings to allow you to compare the efficiency of furnaces. The higher the AFUE percentage is (like 94%), the more efficient the furnace.

Annual Fuel Utilization Efficiency AFUE
