

It's Time to Get Comfortable WITH A NAME YOU CAN TRUST...

Heat or Cool Your Home with York, and you'll be joining some pretty impressive company. Today, York is the company that is specified for the comfort equipment needs of many of the world's most recognized structures—from the U.S. Capitol Building and the World Trade Center to India's Taj Mahal.

Also a proud sponsor of the 2002 U.S. Olympic Team, York is a leading supplier of air conditioning, refrigeration and snowmaking equipment for a wide range of Olympic-caliber sites worldwide.

Now Comfort Comes with the Good Housekeeping Seal

As a homeowner, one of the most important decisions you have to make is choosing a reliable heating and air-conditioning system. As a York dealer, we're proud to tell you that our products have earned the Good Housekeeping Seal.

It's another assurance that after 125 years, York is still a quality leader you can trust.

Champion® Series SINGLE PACKAGE HEATING & COOLING SYSTEMS

Efficient, All-Season Comfort
in One Compact Package

Champion® Series

COMPACT SINGLE PACKAGE GAS HEATING & ELECTRIC COOLING SYSTEM

The York® Champion® Puts Year-round Comfort in a Single Package.

A Champion® Single Package System is designed to provide year-round comfort without taking up valuable space inside your home. You can count on this quiet, high-efficiency unit to keep energy and operating costs low during the hottest weather, or the coldest—for many years of comfort.

Energy Savings in Any Season.

A Champion could reduce year-round energy use by up to 40% compared to older central air and heating systems. Proven gas heating technology such as high-transfer aluminized heat exchanger tubes and clean-burning inshot burners deliver high-efficiency during the heating season—up to 80.4% AFUE. During the summer months, York's® exclusive coil design improves heat transfer and provides cooling efficiency ratings as high as 10.5 SEER. You'll appreciate the savings.

More Comfort.

Your York Dealer can adjust fan speed and air flow to the level best suited to heating or cooling your home. So, you'll have the right performance for maximum comfort any time of the year.

Quieter Comfort.

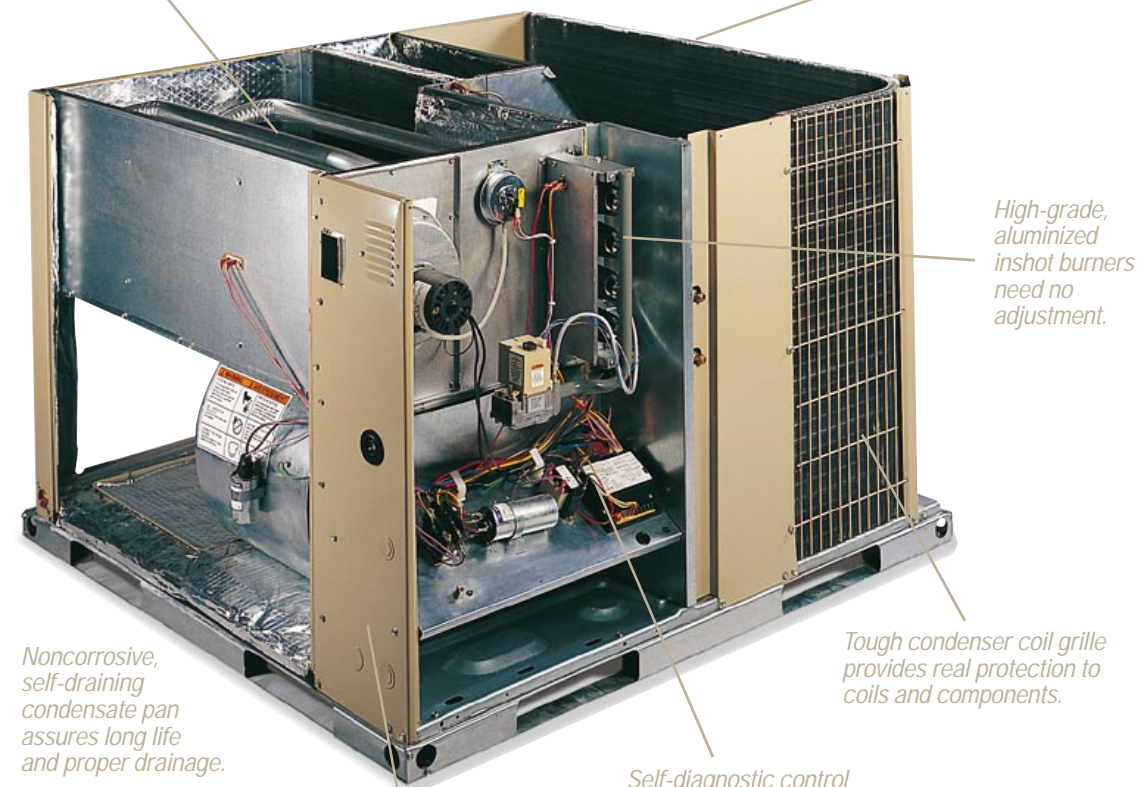

A Champion is designed to be quiet: Its rigid top panel and embossed base pan reduce vibration noise, and the enhanced fin coils muffle operating sounds. Plus, the compressor is mounted on rubber isolators for quiet operation. And since all major components are located outside your home, its operation is very quiet inside.

Easier Installation.

These versatile units can start saving you money even before your new system is turned on. The entire unit

Blow-through design with reliable aluminized heat exchangers.

Hardened aluminum fin and grooved copper tube coils provide durable, highly efficient operation.

High-grade, aluminized inshot burners need no adjustment.

Noncorrosive, self-draining condensate pan assures long life and proper drainage.

Tough condenser coil grille provides real protection to coils and components.

Self-diagnostic control with ComfortMatch™ speed control.

Salt-spray-tested steel cabinet resists fading and corrosion.

is designed for mounting on a rooftop or ground-level slab with minimal fitting, cutting, or adjustment. And connections are simple, so your contractor can save time and materials.

Engineered for Durability.

Quality materials and manufacturing processes ensure that the system is built like a

Champion. The compressor is specially protected from high operating temperatures and pressures. The coils are constructed from copper tubing and hardened-aluminum fins. Plus, they're protected from external impact by a tough, decorative grille. The permanently lubricated, long-life fan motors need no annual maintenance.

And the cabinet is made of heavy-duty galvanized steel with an extraordinary powder paint finish that resists corrosion and fading—even after the toughest salt-spray test in the industry. The top panel, with its "drip edges" and unique "water shed" design, provides additional protection against corrosive weather conditions.

The York Champion® Series: Warranted for Many Seasons of Satisfaction.

At up to 10.5 SEER and 80.4% AFUE, this durable gas heating and electric cooling system can reduce energy costs and keep your home comfortable year-round.

The York Champion unit is built for years of trouble-free service—a claim we're backing up with

some very nice warranties. All single-phase models have a 10-year limited warranty on the heat exchanger, a 5-year limited compressor warranty, and a 5-year limited warranty on all other unit parts. Three-phase models have a 10-year limited warranty on the heat exchanger, a 5-year limited compressor warranty, and a 1-year limited warranty on all other unit parts.

Increase your benefits, and peace of mind, with additional parts-and-labor coverage from the YORKCare™ Comfort Plan. Several parts-and-labor warranty options are available, some with coverage lasting up to 10 years.

Ask your York Dealer for details.
